I am sending this note to urge you stop NAB's petition 04-160. Big business must change the way they service the public. X-m Radio with its instant traffice & weather has been a god send. I don't like using my phone when driving and all I do is put on the XM station for the traffic and weather. I work in al very large city and this informaiton given to me by XM radio has worked out well. I want this service to continue as my selection of service. After all regular radio is not doing it.
